EDUCATION

Canara Engineering College <i>Bachelor of Engineering in Information Science and Engineering; CGPA: 7.91/10</i>	Mangalore, India 2023 – 2027
M.E.S. PU College <i>Pre-University Course (PUC); Percentage: 91%</i>	Sirsi, India 2022 – 2023

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C
Frontend: React.js, HTML, CSS
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: MongoDB, MySQL
AI & GenAI: Machine Learning, Deep Learning, NLP, Transformers, LLMs, LangChain, RAG
Data Analytics: Power BI, Tableau, Pandas, NumPy, Plotly, Excel
Developer Tools: Git, GitHub, VS Code, Postman

PROJECTS

Sphere (SkillBridge) | *React.js, Node.js, Express.js, MongoDB, REST APIs*

- Addressed the barrier of expensive online courses by building a peer-to-peer skill-swapping platform where users exchange technical skills through a structured time-credit barter system.
- Developed backend services in Node.js and Express.js to manage user profiles, skill requests, credit transactions, and dynamic session scheduling.
- Engineered flexible MongoDB schemas to handle match requests, pending swap approvals, and user rating histories accurately.
- Built a clean frontend in React.js featuring skill search, category filtering, and interactive request dashboards to ensure seamless user engagement.

AI Business Analytics Platform | *React.js, Python, FastAPI, Prophet, Pandas, Plotly*

- Built a full-stack business intelligence application featuring dynamic data visualizations and predictive trend models.
- Implemented Prophet Forecasting algorithms to predict sales trends and provide actionable business recommendations.
- Created interactive KPI dashboards with Pandas and Plotly integrated seamlessly into a React.js user interface.
- Designed clean REST API architectures using FastAPI for smooth communication between analytics services and the web client.

Biometric Blood Group Detection System | *Python, Machine Learning, Image Processing*

- Collaborated in a team to build a machine learning model designed to detect blood groups based on biometric feature inputs.
- Performed extensive data preprocessing and feature extraction techniques to ensure model training accuracy.
- Participated actively across model testing, validation, cross-verification, and technical project documentation.

ACHIEVEMENTS & CERTIFICATIONS

IISc Bangalore Workshop – Attended Foundation Workshop on Product Design & Innovation (DM ISSC).

Sclerathon (24-Hour Hackathon) – Developed an AI-powered customer call agent using Vapi, Python, and NLP workflows within 24 hours.

CEATHERION 2025 (24-Hour Hackathon) – Built a 24-hour hackathon project focused on automated medical information retrieval.

Infosys Springboard Certifications – Artificial Intelligence, Deep Learning, Natural Language Processing, C Programming.

NPTEL Certification – Programming in Java.

MongoDB Certification – Database Foundations & Operations.
