github.com/Mahesh-0711 — Sirsi, Karnataka

Summary

Information Science and Engineering undergraduate with hands-on experience in AI, Machine Learning, Data Science, and Data Analytics. Skilled in building AI-powered applications, predictive models, and data visualizations using Python. Seeking an entry-level AI/ML, Data Science, or Data Analytics role.

Education

Canara Engineering College, Mangalore	2023–2027
B.E. – Information Science & Engineering	CGPA: 7.91/10
M.E.S. PU College, Sirsi	2022–2023
Pre-University Course (PUC)	91%
Don Bosco High School, Sirsi	2020–2021
SSLC	94%

Technical Skills

- **Programming Languages:** Python, Java, JavaScript, C, R
- **Frameworks & Libraries:** FastAPI, React.js, Pandas, NumPy, Plotly, Google Gemini API
- **AI/ML:** Machine Learning, Computer Vision, Deep Learning, Natural Language Processing, Prophet Forecasting
- **Databases:** MySQL, MongoDB
- **Data Analytics & Visualization:** Power BI, Tableau, Microsoft Excel
- **Developer Tools:** Git, GitHub, VS Code, Postman
- **Concepts:** REST APIs, Data Structures, Object-Oriented Programming, DBMS, Computer Networks

Projects

Fingerprint-Based Blood Group Detection System — Team Project (4 Members)

- Collaborated in a 4-member team to develop a fingerprint-based blood group detection system using image processing and machine learning techniques.
- Performed fingerprint image preprocessing and feature extraction to prepare data for model development.
- Assisted in applying machine learning techniques and participated in testing, validation, and result analysis.
- Contributed to project documentation and actively collaborated across all phases of the development lifecycle.

AI Business Analytics Platform — Full-Stack AI Application

- Built a full-stack AI-powered business analytics platform using FastAPI and React.js.
- Integrated Google Gemini API to generate AI-powered business insights and recommendations from uploaded datasets.
- Implemented Prophet Forecasting to predict future sales trends and support data-driven decision making.
- Developed interactive KPI dashboards using Pandas and Plotly.
- Designed and implemented REST APIs for seamless frontend-backend communication.

Certifications

- Infosys Springboard: Artificial Intelligence, Deep Learning, Natural Language Processing, Computer Vision, C Programming
- NPTEL – Programming in Java
- MongoDB Certification
- DM ISSC – Foundation Workshop on Product Design & Innovation

Achievements

- **Sclerathon Hackathon – AI-Powered Customer Call Agent:** Developed an AI-powered customer call agent for a company-provided problem statement using Vapi, Python, and NLP, implementing conversational AI workflows and API integration.
- **CEATHERION 2025 – 24-Hour Hackathon:** Developed an AI-powered Medical Assistant using Flask and the Google Gemini API to generate health-information responses.
